FOR IMMEDIATE RELEASE

PNA Technologies Achieves NIST SP 800-171 Compliance to Strengthen Cybersecurity for Defense and Aerospace Supply Chains

JAMAICA, N.Y. — PNA Technologies, a specialized U.S. manufacturer of precision gaskets and engineered seals, today announced that it has successfully implemented and verified its compliance with **NIST SP 800-171 Rev. 2**. This milestone reinforces PNA Technologies' commitment to safeguarding Controlled Unclassified Information (CUI), protecting defense supply chain integrity, and meeting strict Department of Defense (DoD) DFARS cybersecurity standards.

As a trusted supplier to prime defense contractors, aerospace manufacturers, and critical infrastructure sectors, PNA Technologies' cybersecurity infrastructure now features advanced cloud enclave architecture, multi-factor authentication, endpoint detection, and physical security protocols designed to prevent unauthorized access and cyber threats.

Elevating Security and Precision Manufacturing

This cybersecurity achievement builds upon PNA Technologies' established quality management and regulatory foundation, which includes ISO 9001:2015 Certification, ITAR Registration, and a commitment to 100% Made in USA manufacturing at its Jamaica, Queens facility.

"Securing our information system to meet NIST SP 800-171 standards is a vital step in supporting our defense and high-reliability technology partners," said Lawrence Rosenstein, President of PNA Technologies. *"Our clients rely on us not only for high-performance precision components, but also for absolute data privacy and supply chain resilience. Achieving this level of cybersecurity compliance ensures we remain a reliable, audit-ready partner for critical U.S. defense programs."*

In addition to its enhanced IT environment, PNA Technologies continues to expand its specialized manufacturing capabilities, delivering engineered solutions including:

- **EMI / RFI Shielding Gaskets**
- **Conductive Elastomer Flange Gaskets & Conductive O-Rings**
- **Thermal Gap Pads & Electrical Insulation**
- **Custom Die-Cut & CNC-Cut Gaskets & Seals**

By combining ISO 9001:2015 quality precision with NIST SP 800-171 cybersecurity alignment, PNA Technologies offers prime defense contractors a fully vetted, secure U.S. manufacturing partner prepared for upcoming CMMC (Cybersecurity Maturity Model Certification) requirements.

About PNA Technologies

PNA Technologies is a Queens, New York-based custom gasket and sealing solutions manufacturer specializing in high-performance materials for electronics, aerospace, defense, and industrial applications. Operating as an ITAR-registered and ISO 9001:2015 certified manufacturer, PNA Technologies delivers American-made precision components engineered to meet exact client specifications and rigorous military and industrial standards.
